Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Although the closest prior art (GB 1354011) teaches the preparation of alkynediols by reacting ketones with acetylenic hydrocarbons (acetylene and alkyne monoalcohols), in an [hydrocarbon] organic solvent, in the presence of a potassium alkoxide base, it does not teach or suggest the presently claimed ranges of ratios of the acetylenic hydrocarbon to ketone and the potassium alkoxide to ketone which causes the production of gel like adducts having a spherical surface, whereby allowing the reaction mixture to remain stirrable during the entire reaction. The references cited in the Search Report have been considered. All claims (1-8) are allowed.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
